Ndjido Ardo Fall . Jarvis Consulting

My name is Ardo. I recently graduated in computer sciences and software engineering from Université du Québec à Montréal (UQAM). I worked for UQAM as an academic support assistant for a year and a half. It was a remote job. I helped the students whenever they had issues with the technologies provided by the school. I also worked at SNR Legal as an archivist for a year. I was assigned to destroy the out-of-date documents and help with the digitization. I am currently part of a project to create a new social media. I act as a full-stack developer. I also help my less experienced colleagues. I am passionate about the software industry because it is ever-changing. There are always new technologies coming out. I also like the creative side of it, thinking out of the box to find new solutions and innovate.
